About me

From last 9 years I am working in C++ application development in Cyber security, HFT and PLM & CAD domain. Mostly, I worked on C++ and related tools but also small part of experience is on C#, Java and web technologies. I have build expertise in multithreading, meta-programing, UI designing and high-performance C++ coding. And I have good understanding & interest in parallel programing and system programming. I am Highly motivated and quick learner.

Skills

- C++ 11/14/17/20
- Standard template library (STL)
- QT, Boost, Curl, ProtoBuf, Zlib, nlohmann json, Openssl etc. libraries.
- Data structure & Algorithms
- Multi-Threading
- Lock-free algorithms
- Template Programming
- IPC like Socket, Pipe, Shared memory
- 10+ Design Patterns
- Git, Perforce SCM
- Python, shell & Batch Scripting
- CMake, Make, Boost & MSBuild build system
- Micro benchmarking
- Junit, Gtest etc. unit test framework.
- Valgrind, GDB, TSAN, Dr Leak etc. other memory leak & thread deadlock detection tools for windows and Unix platform.
- WIX and advance installer for windows and Unix application installer.
- C# Java Javascript HTML
- Xamarin framework
- SQL and Database

Experience

MEMBER OF TECHNICAL STAFF III

Colortokens India LLP. 2.9 Years Oct 2021 – Jul 2024

Contributed in agent software development, which is developed for multi-platform like Windows, Linux, AIX, Solaris, and Mac. Tasks like, packet capturing, analyzing, and reporting to server via REST API, Firewall rule programming. Also, have work on maintaining installer for same. Worked on POC project to support agent on win32, RHEL & Solaris like platform. In 3.0 agent, contributed major role in C++ design & code review.

Skills utilized: C++17, micro benchmarking, Make, CMake build tools, Boost, Curl, zlib, Shell script, IPC, WIX and Linux installer, analysis of memory leak, core/crash dump and high CPU usage. Build time optimization.

SENIOR SOFTWARE ENGINEER

FIS Solutions Pvt. Ltd. 2 Years Oct 2019 - Oct 2021

Trading order routing. Worked on module which is responsible to communicate with exchange in its protocol over the network. Written unit tests and exchange simulator. Actively involved in code review, training new joiners and in recruitment. Worked with more than 5 APAC exchange and on their native/standard protocols. Used Valgrind and sub tools as per application. In C++ development.

Skills utilized: C++14, Boost build, Boost lib, Python script, IPC, Socket programming, gtest framework.

SOFTWARE ENGINEER

HCL India Pvt. Ltd. 1.3 Year Jul 2018 - Oct 2019

Worked on Teamcenter (PLM suite) In C++ development and writing unit tests.

Skills utilized: C++ and Junit test framework

Skills utilized: C++98, Perforce, junit test framework.

SOFTWARE ENGINEER

Prototech Solutions Pvt. Ltd. 2.8 Year Sep 2015 - Jul 2018

Katera visualizer an iOS app developed in Xamarin for visualizing IFC file with help of xBIM toolkit and WebGL. Done shader programming for Billboard implementation.

Inspection Xpert 2.0, developed in C++ QT, along with used pdf and 3D file rendering libraries, and Excel API.

Inspection Xpert 1.0, developed in C# with DevExpress, Excel API

Skills utilized: C++11, QT library, C#, Js, HTML, CSS, Xamarin framework, WebGL.

Awards

- Quarterly champion award, Q4 2023, in Colortokens for fast bring up of Solaris Agent.
- Budding star, towards dashing contribution in Colortokens in Aug 2022.
- Recognition in FIS for writing exchange simulator for KRX & KRUSG exchanges, in 2019.

Educational background

MASTER's in COMPUTER NETWORKS,

Pune University Distinction 2013 - 2015
8.7 CGPA

Research Paper Publication in IEEE Journal 2015 On IOT
Wormhole Attack Detection

BACHELOR's in COMPUTER ENGINEERING

Pune University First Class 2008 - 2013

HIGHER SECONDARY SCHOOL

Maharashtra State Board 76 % 2006 - 2008

SECONDARY SCHOOL

Maharashtra State Board 80 % 2005 - 2006
